

# What Are The Differences Between Pages & Spreads?

A PAGE is the left or right side of a SPREAD

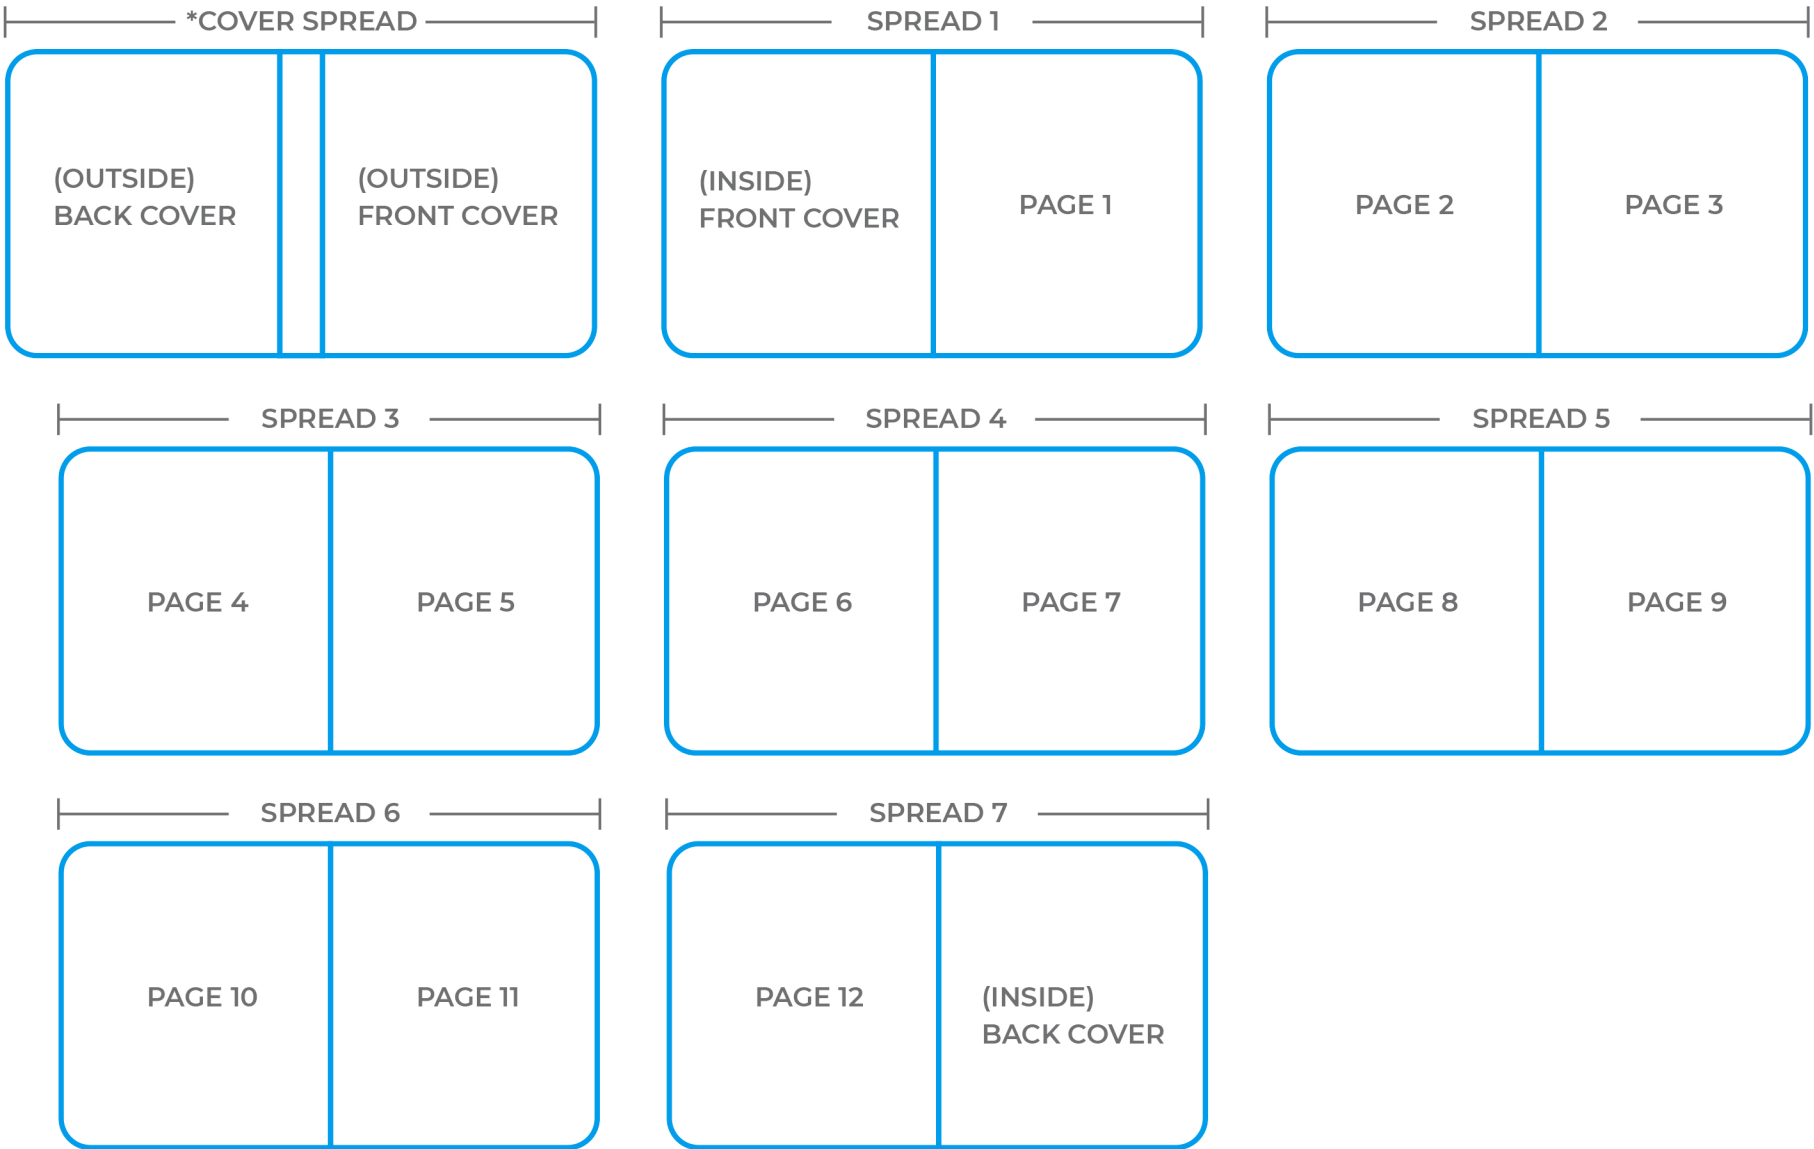

A SPREAD consists of two pages viewed together.

## How to Count Pages & Spreads

The front and back cover are considered 1 spread

Here is a visual to illustrate the number of pages and spreads in a 12 page book

To calculate the page count, do NOT include the front cover and back cover in your tally.

In our example, the 7.5" x 7.5" board book with 7 spreads has 12 pages (not including the inside and outside cover)
